Long	32 ° 18 ' E
Lat	31 ° 15 ' N

Natural Characteristics

Weather	Mild.
Water Density	1.025 g/cm ³
Raining Season	winter
Tidal range and flow	0.3 m.

Location

Port Said port is situated on the Northern entrance of the Gulf of Suez. It is considered one of the main Egyptian ports due to its distinguished location at the crossroad of the most important world sea trade route between the East and Europe via Suez Canal, and the most extensive transshipment port in the world.

The port is bordered, seaward, by an imaginary line extending 0.5 N.M. from the western breakwater boundary till the eastern breakwater end. And from the Suez Canal area, it is bordered by an imaginary line extending transversely from the southern bank of the Canal connected to Manzala Lake, and the railways arcade livestock.
